# Seed Paper Promotions

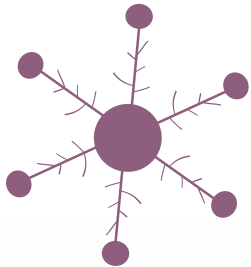

Our Holiday Seed Paper Promotions are the most earth-friendly in the industry

## Fully Plantable

Just like it sounds, fully plantable products are promotions printed using high-quality, full-color CMYK earth-friendly printing directly on the seed paper! This means the recipient can plant the entire promotion with no waste. The paper and inks simply biodegrade away into the soil as your flowers, herbs, or other seeds begin to sprout. This format allows plenty of room to feature your branded message just like you want. When sent as a stand-alone postcard, the seed paper travels at standard postcard rates for an all-inclusive promotion that gets results!

We offer several different grades of seed paper for printing depending on your needs and preferences. Because printing on colored seed paper will make your graphics and text appear muddy, we recommend the hand-stamped look and feel of letterpress printing on our colorful seed paper. Because we own and operate our own letterpress printers, you'll be impressed with how affordable this option can be.

## Integrated Plantable Shapes

Our integrated plantable shape option builds on the Lil' Bloomer format that we invented over 20 years ago. Don't be fooled by imitators – our seed paper shapes offer the most value and impact of any promotional item on the planet. We diecut our brightly colored seed paper into truly unique plantable shapes and then integrate them into a complete and cost-effective promotional product. Don't see the shape you need from our extensive shape list? Then go custom! We make it easy and affordable for you to create your own seed paper shapes for a truly custom plantable promotion. We have dozens of formats that feature hundreds of seed paper shapes with the highest germination rates available. Because the shapes utilize less seed paper, they are naturally more cost-effective. The recycled cardstock can be printed with heavy ink coverage.
